EXPERIENCE

yadada , Remote — *Frontend Developer*

January 2021 - PRESENT

Worked on multiple projects, the biggest one being loplo.com.
My role was to do the full frontend part of the app using the newest technologies like Next.js, Firebase, Tailwind CSS & Typescript.

MTopTech , Stara Pazova — *Internship*

July 2021 - November 2021

Worked mainly on Wordpress websites through various WP's builders like Oxygen & Elementor. I learned a bit of PHP, Laravel, Vue.js, Wordpress and WinterCMS.

EDUCATION

Tehnička Škola Stara Pazova, Stara Pazova — *High school degree*

September 2017 - June 2021
CAD Technician - Graduated with grade 4/5

PROJECTS (More on my website)

Loplo — *Next.js, Tailwind CSS, Firebase*

Loplo lets you search for a word or phrase in thousands of videos and play the exact time when the word is pronounced by a native speaker.
Project was created with Next.js advanced features like Middleware & SSG.
Live website: http://loplo.com

HBO GO Clone — *React.js, Styled-Components, TMDB Api.*

HBO GO is a one-page clone app of hbogo.rs website.
The page fetches data from TMDB Api and dynamically creates a slider that contains movie-card components which have a unique modal when clicked.
Github repo: https://github.com/vujic02/HBO-GO-clone.
Live website: https://hbo-go-clone.web.app.
